My Portfolio

Education

E&ICT IIT Guwahati - AlmaBetter — **January 2024- August 2024**
Advanced Certification in Full Stack Data Science

University Institute of Technology Bhopal — **March 2020-June 2022**
Masters of Computer Applications
8.6
Masters

Skills

Core Skills:

Data Analysis | Data Cleaning | EDA | Dashboarding | Business Intelligence

Tools & Technologies:

Power BI | SQL | Excel | Python (Pandas, NumPy, Matplotlib) | Tableau

Platforms:

Jupyter Notebook | Google Colab | VS Code | PGAdmin

Experience

CENTRE FOR RESEARCH & INDUSTRIAL STAFF PERFORMANCE — **December -2024 - present**
Power BI Developer | IT Consultant | Data Analyst — Bhopal
CRISP

- Delivered **50+ production-grade Power BI dashboards** across **3 government domains (E-Commerce , Education, E-Governance)**, enabling real-time monitoring for **10+ state-level initiatives**
- Owned end-to-end development of dashboards for **AIQC, DBT (MP & Pan-India), CMCLDP, MPJAP**, and **multi-university systems (RGPV, KTBU, GSP etc)**
- Analyzed datasets ranging from **50K to 500K+ records**, uncovering actionable insights on **quality compliance, supply gaps, and beneficiary distribution trends**
- Reduced manual reporting effort by **30–40%** by replacing Excel-based workflows with automated, real-time dashboards
- Partnered with **5+ cross-functional teams (business, DBMS, operations)** to translate ambiguous requirements into structured analytical solutions
- Built optimized SQL queries (joins, aggregations, transformations) to ensure **reliable and scalable data pipelines for reporting**

Projects

University Performance Dashboard

- Delivered dashboards for **5+ institutions**, analyzing student performance, enrollment trends, and academic KPIs
- Automated recurring reports, cutting manual effort by ~25% and improving data accessibility for stakeholders

Agriculture Input Quality Control

- Designed a centralized dashboard tracking **10K+ quality test records**, enabling rapid detection of **misbranding and non-compliance patterns**
- Unified **3+ disparate data sources** (lab, inspection, dealer data) into a single reporting layer
- Improved regulatory visibility and reduced manual monitoring effort by ~30%

Customer Analytics & Prediction Model

- Performed EDA on datasets with 1M+ records using Python
- Built regression and classification models improving prediction accuracy by 18%
- Delivered insights that improved marketing strategy decisions

Certifications

Udemy — **September 2023**
Complete Web Development Bootcamp(MERN) 2023

Coursera — **January 2024**
Applied Data Science Capstone
